October 25, 2019 — iatricSystems®, Inc. today announced its commitment to National Cybersecurity Awareness Month (NCSAM), held annually in October, by signing up as a Champion and joining a growing global effort to promote the awareness of online safety and privacy. NCSAM is a collaborative effort among businesses, government agencies, colleges and universities, associations, nonprofit organizations and individuals committed to this year's NCSAM theme of 'Own IT. Secure IT. Protect IT.' which encourages everyone to #BeCyberSmart through cybersecurity best practices.

"No one can dispute the importance of being aware of what it takes to ensure online safety and privacy" says Rob Rhodes, iatricSystems Executive Vice President. Rob goes on to say, "But, awareness is just the first step. Taking action to utilize the tools and resources to ensure secure remote access and patient privacy is where we can begin to make a difference. iatricSystems is committed to providing hospital organizations the education and products and services that support our customer's quest for cybersecurity safety."

Now in its 16th year, NCSAM continues to build momentum and impact with the ultimate goal of providing all Americans with the information they need to stay safer and more secure online. iatricSystems is proud to support this far-reaching online safety awareness and education initiative which is co-led by the National Cyber Security Alliance (NCSA) and the Cybersecurity and Infrastructure Agency (CISA) of the U.S. Department of Homeland Security.

"Cybersecurity is important to the success of all businesses and organizations. NCSA is proud to have such a strong and active community helping to encourage proactive behavior and prioritize cybersecurity in their organizations," said Kelvin Coleman, executive director, NCSA.

For more information about NCSAM 2019 and how to participate in a wide variety of activities, visit staysafeonline.org/ncsam. You can also follow and use the official NCSAM hashtag **#BeCyberSmart** on social media throughout the month.

About iatricSystems® Inc.

About National Cybersecurity Awareness Month
NCSAM is designed to engage and educate public- and private-sector partners through events and initiatives with the goal of raising awareness about cybersecurity to increase the resiliency of the nation in the event of a cyber incident. Since the Presidential proclamation establishing NCSAM in 2004, the initiative has been formally recognized by Congress, federal, state and local governments and leaders from industry and academia. This united effort is necessary to maintain a cyberspace that is safer and more resilient and remains a source of tremendous opportunity and growth for years to come. For more information, visit staysafeonline.org/ncsam or niccs.us-cert.gov/national-cybersecurity-awareness-month-2019.

About NCSA
NCSA is the nation's leading nonprofit, public-private partnership promoting cybersecurity and privacy education and awareness. NCSA works with a broad array of stakeholders in government, industry and civil society. NCSA's primary partners are the Cybersecurity and Infrastructure Security Agency and NCSA's Board of Directors, which includes representatives from ADP; American Express; Bank of America; CDK Global, LLC; CertNexus; Cisco; Cofense; Comcast Corporation; Eli Lilly and Company; ESET North America; Facebook; Google; Infosec; Intel Corporation; Marriott International; Mastercard; Microsoft Corporation; Mimecast; NXP Semiconductors; Proofpoint; Raytheon; Symantec Corporation; Trend Micro, Inc.; Uber: U.S. Bank; Visa and Wells Fargo. NCSA's core efforts include National Cybersecurity Awareness Month (October); Data Privacy Day (Jan. 28); STOP. THINK. CONNECT.™, the global online safety awareness and education campaign co-founded by NCSA and the Anti-Phishing Working Group with federal government leadership from the Department of Homeland Security; and CyberSecure My Business™, which offers webinars, web resources and workshops to help businesses be resistant to and resilient from cyberattacks.
