

Harris Healthcare, Through Iatric Systems, Acquires Haystack Informatics

Wakefield, Mass., January 31, 2019 – Iatric Systems, Inc., a technology company dedicated to helping healthcare organizations enhance their IT investments, today announced that Harris Healthcare, through Iatric Systems, has acquired Haystack Informatics, a behavioral analytics company that helps health systems safeguard patient privacy and optimize operations.

Iatric Systems Security Audit Manager™ has been recognized as the KLAS® Patient Privacy Monitoring Category Leader for four consecutive years (2015, 2016, 2017, and 2018). “The acquisition of Haystack Informatics represents great opportunity for Iatric Systems customers. Haystack’s user centered design and advances in behavioral analytics will not only enhance our patient privacy monitoring solutions, but it will also allow us to extend our platform into new areas of behavioral insights,” said Frank Fortner, Executive Vice President of Iatric Systems.

Haystack technology utilizes the latest in big data technologies and advanced behavior analysis to decipher and learn a health system's operations. Its AI-ready solution organizes information in an intuitive and actionable manner, removing false positives and highlighting variations in care across the system, so privacy experts can focus on critical threats before a breach occurs. Adrian Talapan, Co-Founder and CEO of Haystack Informatics said, “Iatric Systems has hundreds of implementations of Security Audit Manager with more than 15 years of applied patient privacy monitoring experience in the healthcare industry. We look forward to bringing our advances in behavioral analytics to Iatric Systems customers in order to enhance patient privacy and improve operational performance throughout the health system.”

About Iatric Systems, Inc.

Iatric Systems, a business unit of Harris’ Healthcare group, is a technology company dedicated to helping healthcare organizations enhance their IT investments. We do so with our diverse healthcare experience, an extensive partner network, and our proven capabilities in patient privacy, interoperability, and EHR optimization. For more than 25 years, Iatric Systems has delivered solutions to more than 1,300 healthcare organizations and has integrated more than 800 vendor solutions. About Haystack Informatics

Haystack Informatics, spun out from Children's Hospital of Philadelphia, is a digital health company that helps leading health systems monitor patient privacy and improve operational efficiency. Using activity log data from electronic health records (EHR) systems, our technology makes sense of the interactions that exist between health system employees and patients, identifying anomalous activity patterns and guiding towards the most impactful areas for EHR and staff optimization. For general information, see <https://www.haystackinformatics.com>.
